

PCR Water (PCR Grade)

Cat. No.	Size
E0211-01	5 x 1.5 ml
E0211-02	10 x 1.5 ml

Storage Conditions:

Store at -20°C (long term) or at 2-8°C (short term).

Ultrapure, sterile, deionized, double distilled and prealiquoted water.

Suitable for use in:

- all PCRs and RT-PCRs
- all conventional and qPCRs with any instrument
- cDNA synthesis
- sequencing / cycle sequencing

Quality control:

All lots are monitored for contaminating 3'-exonuclease, 5'-exonuclease as well as for nonspecific single- and double-stranded DNase activities.

All lots are PCR-assayed for absence of contaminating DNA from bacterial, fungi and human sources.
